

Acceptance conditions

Delivered goods have to be free of foreign substances, impurities and ionising radiation. Dangerous, environmentally hazardous materials and materials containing pollutants are excluded from acceptance. Goods with a defect will be refused. If a delivery consists largely or completely of materials that are not accepted, the material will not be unloaded.

Exclusion of acceptance

The following materials are generally excluded from acceptance:

- Hollow bodies, gas cylinders, gas tanks, hydraulic pressure accumulators
- Oil-filled compressors of cooling devices / refrigerators
- PCB oil-filled transformers / condensers / industrial condensers / radiators / switches etc.
- Radioactively contaminated scrap metal
- Explosives and ammunition (incl. airbags)
- Electric night storage and electric storage stoves and fireclay bricks (not disposed of)
- Barrels with undefinable contents
- Building materials with asbestos or eternite adhesions
- Hollow bodies not emptied of residues (e.g. spray cans, fire extinguishers, shock absorbers)
- Gas discharge lamps
- Materials with KMF or glass wool adhesions
- Packaged end-of-life vehicles
- End-of-life vehicles that have not been properly disposed of (tanks that have not been completely emptied; petrol, diesel, LPG, natural gas)
- Tyres (cars/trucks/construction machinery)
- Batteries
- Noise suppression plates (of all types) from a proportion $\geq 10\%$

The following materials are excluded from the area of electrical waste, which we accept as groups 4 (white goods) and 5 (small electrical appliances):

- Batteries, or appliances that still contain batteries
- Electrical appliances and components containing mercury (e.g. LCD monitors)
- Refrigerators that still contain coolant

Cost of refusals

Impurities that are apparent on receipt of the goods are listed as a weight deduction. This includes the weight specifications or the weight determinations in kg for components that are not of the same type. These include dirt, wood, rubber, concrete, asphalt, paper, foil, plastics, water, snow and ice.

The acceptance report is decisive for the settlement.

In addition, the following disposal costs plus the applicable value-added tax will be charged:

- | | |
|--|------------------|
| ➤ Impurities (debris) | 200,00 €/t |
| ➤ Car tyre | 15,00 €/piece |
| ➤ Truck tyre | 45,00 €/piece |
| ➤ Other tyres (also on rim) | 25,00 €/piece |
| ➤ Gas bottle closed | 220,00 €/piece |
| ➤ Acetylene cylinders | 480,00 €/piece |
| ➤ Technical gases | 1.400,00 €/piece |
| ➤ Hollow bodies | 110,00 €/piece |
| ➤ Safes | 250,00 €/piece |
| ➤ Noise suppression plates (of all types; proportion $\leq 10\%$) | 250,00 €/ t |
| ➤ Coarse shredder pre-material | 250,00 €/ piece |
| ➤ Lithium batteries and fuel cells | 250,00€/piece |
| ➤ Flat-rate cost handling for radioactive finding | 250,00 € |
